

GENOMICS

PRIMER4PHARMACY

We have an exciting opportunity for you to attend a one day Genomics Primer course at the University of Southampton, in association with the Central and South Genomic Medicine Service Alliance.

Who can study the course

This study day is specifically designed for Pharmacy staff. This one-day course is sponsored by Health Education England South East, with course fee underwritten, and so **free of charge** to attendees.

Course contents

This course aims to give participants a grounding in the technology and application of genomic science, enabling them to appreciate the findings of genomic clinical reports and their impact on treatment, prognostics and family screening, and in particular the use of pharmacogenomics to facilitate drug choice, dose adjustment, and avoidance of adverse drug reactions.

Course date and location

The course will take place on **Monday 27th March 2023** in Building 100 at the University of Southampton Highfield Campus, SO17 1BJ, running from 09:00 am to 5:30 pm. Lunch is not provided. However, there are facilities on-site to buy food and drink. There is some pay and display parking available, or the site is accessible by a 20 min bus ride from Southampton Central railway station. Further transport information can be found on this link:
www.southampton.ac.uk/transport/index.page

Registration

If you would like to apply to join the course please visit the link below or scan the QR. We are anticipating that demand will be greater than places available, and therefore will prioritise applications from those who can indicate how the knowledge gained from the course will be put into practice and/or disseminated.
